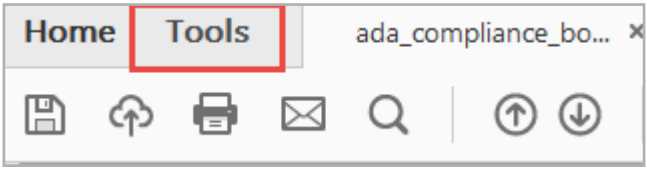
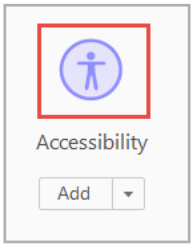
Adobe Acrobat Pro Accessibility Checker

Acrobat Pro has tools to check for and correct accessibility issues in PDF documents.

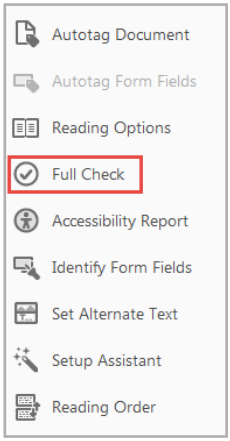
1. Open the PDF document in Acrobat Pro, then click on **Tools.**



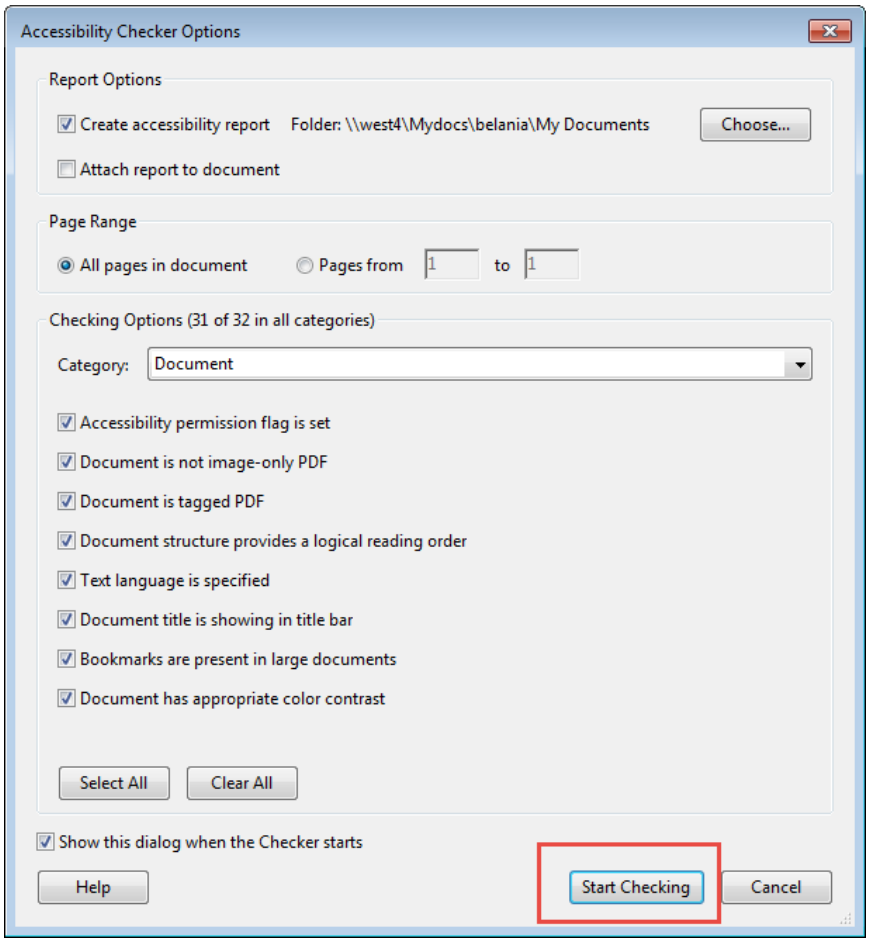
2. Scroll down and then click on **Accessibility**.



3. Click on **Full Check**.



4. In the **Accessibility Checker Options** dialog box, select the options as shown below, or select or deselect options per your specific need. When you are done, click on **Start Checking**.



5. As shown on the following page, a list of which accessibility requirements your document has passed and failed will be generated. Click on each title to expand the content and follow the instructions.
