

SUNY D2L LUMI ROLL OUT

DIGITAL LEARNING ENVIRONMENT (DLE) WILL SOON INCLUDE AI
FUNCTIONALITY THROUGH D2L LUMI PRO.

SUNY ANNOUNCES ROLLOUT OF D2L LUMI PRO

SUNY is pleased to announce the system-wide roll-out of D2L Lumi Pro, which is the Generative AI Capability within Brightspace, starting in July 2025. The initial deployment of Lumi focuses on creating workflow efficiencies for faculty and course creators by helping them to generate quiz questions, discussion prompts, and assignment ideas. Additional functionality will be rolled out by D2L in the future to support students in achieving learning outcomes and provide data-driven insights to faculty and campus leaders.

ABOUT LUMI

- Lumi leverages Anthropic's Large Language Model (LLM) Claude by using content provided by the course creator.
- SUNY's agreement with D2L protects Faculty IP by ensuring that:
 - D2L does not own input content.
 - D2L does not own output content.
 - D2L will not use input content to train the Generative AI models.
- SUNY's agreement with D2L requires that users will not represent that output content is human generated when it is not.

SUPPORT PROVIDED TO CAMPUSES

- Lumi will be deployed to all campuses using Brightspace and available to all faculty members on those campuses. It is an individual faculty choice to use Lumi or not in their courses.
- Training and resources will be provided to all campus DLE Administrators in advance of Lumi being made available to faculty.
- Support for Lumi will be provided by the SUNY Online Help Desk and Application Services teams for campuses who subscribe to those services.
- Training materials and documentation will be developed and made available to all campuses to use or adapt based on their campus training plans. Synchronous webinars will also be delivered for faculty who prefer that modality.

NEXT STEPS

- Further communication on technical implementation will be provided to DLE campus administrators.
- Costs and Participating Institution Agreements (PIAs) will be communicated to campus CAOs, CIOs, and CFOs.
- Questions can be directed to:
 - Kim Scalzo (kim.scalzo@suny.edu) for questions re: SUNY's agreement with D2L
 - Dan Feinberg (dan.feinberg@suny.edu) for questions re: costs
 - Harry Cargile (harry.cargile@suny.edu) for questions re: technical implementation and support
 - Jamie Heron (jamie.heron@suny.edu) for questions re: training
